SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the *Federal Register* concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the

OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Templates for Extramural Data Management Plans (OMB Control No. 0920-1301, Exp. 6/30/2023) - Extension - National Center for

Chronic Disease Prevention and Health Promotion (NCCDPHP),
Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Data management plans (DMPs) are required of entities using CDC funds to collect or generate public health data. DMPs will be submitted to CDC by grant and cooperative agreement awardees for assessment to verify that they are concordant with CDC's data sharing policy. CDC contractors collecting public health data are also required to create and submit DMPs. This information collection request was developed by CDC's National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) to create standardized templates for DMPs so that they will be easier to create, easier to review, better able to ensure compliance with CDC's requirements, and able to increase the likelihood of first draft approval by project officers. The project was initially approved from June 2019 through June 2023. CDC will request an Extension for approval for another three years. Minor updates will be made to the templates for this extension period to better serve awardee and CDC needs.

CDC requests OMB approval for an estimated 1,240 annual burden hours. There are no costs to respondents other than their time to participate.
